Professional Summary

Data Engineer and Software Developer with over 16 years of extensive expertise in database analysis, design, and development.

Proficient in leveraging SQL Server, SAS, and cloud technologies like Azure and Databricks to optimize ETL processes and enhance data warehousing solutions.

Demonstrates strong skills in automation and performance tuning, with a proven track record of improving data processing speed and accuracy, driving informed decision-making and strategic insights.

Employment History

Johns Hopkins (TIC)

SR. SOFTWARE ENGINEER

2021 - Present

- Designed ETL architecture using Databricks, Azure Data Factory, and Microsoft Fabric.
- Automated data pipelines and cloud migrations using Terraform, PowerShell, and Python.
- Built real-time analytics and reporting solutions with Snowflake and Microsoft Fabric.
- Engineered scalable ETL solutions, enhancing data processing speed and delivering timely insights that informed strategic decision-making.
- Partnered with cross-functional teams to streamline data integration processes, strengthening collaboration and accelerating project timelines.
- Pioneered automated data quality checks, reducing errors and ensuring data integrity for critical business operations.
- Mentored junior developers in best practices and coding standards, fostering a culture of continuous learning and team growth.

Morgan Stanley, Jersey City

September 2022- May 2023

Unisys

DATA INTEGRATION ENGINEER

2020 - 2021

- Built ETL integrations and Power BI dashboards.
- Automated processes using PowerShell, Bash, and Azure Data Factory.
- Developed ETL integrations to enhance data flow, resulting in improved reporting accuracy and expedited decision-making.
- Automated data processing workflows with PowerShell and Azure Data Factory, significantly reducing manual efforts and increasing efficiency.

Ernst & Young

MANAGER, DATA MODELER

2020

- Developed conceptual/logical data models for the Global Tax Platform.
- Managed Azure DevOps and participated in SAFe PI Planning.
- Designed and implemented data models for the Global Tax Platform, enhancing data accuracy and accessibility for tax professionals.
- Managed Azure DevOps processes, leading to streamlined workflows and improved project delivery timelines.
- Conducted detailed analyses of data requirements, resulting in optimized solutions tailored to client needs and measurable improvements.
- Facilitated cross-functional team discussions during SAFe PI Planning, fostering alignment and ensuring project objectives were met.

United Health Group

SQL/ETL DEVELOPER

2019

- Developed SSIS packages and Power BI dashboards.
- Automated SQL Server backups and data transformations.
- Designed and implemented ETL processes to streamline data integration, enhancing reporting accuracy and enabling timely decision-making.
- Automated SQL Server backups, ensuring data integrity and reducing manual intervention, leading to substantial improvements in operational efficiency.
- Worked closely with cross-functional teams to identify data requirements, fostering a shared understanding and ensuring alignment on project goals.

Various Government Contracts

SQL DEVELOPER, ETL DEVELOPER, DATA MODELER

2016 - 2019

- Agencies: SEC, OCC, DOE
- Tools: SAS, SSIS, Tableau, Power BI, Shell Scripting

- Developed complex ETL processes using SSIS, enhancing data flow efficiency and enabling timely reporting for critical government projects.
- Utilized Tableau and Power BI to create dynamic dashboards, resulting in improved data visibility and informed decision-making across various agencies.
- Implemented advanced data modeling techniques, streamlining data integration and facilitating substantial improvements in data accuracy.
- Spearheaded the development of automated reporting systems, leading to noticeable results in data processing times and enhanced stakeholder insights.
- Orchestrated the integration of advanced data analytics tools, driving substantial improvements in data interpretation and project outcomes for government contracts.

IAC

SQL DEVELOPER

2014 - 2016

- Built robust SQL Server databases and supported web applications.
- Used XML, XSLT, and Service Broker for data sharing.
- Developed and optimized SQL Server databases, enhancing data retrieval speeds and improving application performance significantly.
- Implemented XML and XSLT for efficient data sharing, streamlining processes and fostering seamless integration across platforms.

Edgar Online

SENIOR XBRL/SQL DEVELOPER

2009 - 2014

- Developed XBRL financial reports and managed SQL Server databases.
- Led offshore teams and ensured SEC compliance.
- Spearheaded the development of XBRL financial reports, enhancing accuracy and compliance, significantly reducing audit discrepancies.
- Implemented advanced SQL Server database optimization techniques, resulting in improved query performance and reduced data retrieval times.
- Conducted thorough data analysis to identify reporting inefficiencies, driving actionable insights that led to streamlined processes.

Education

Master of Science in Information Technology

University of Denver, Expected Graduation: Fall 2026

B.Sc. in Accounting

University of Maryland-College Park

Associate of Arts Degree in Info Systems/Accounting

Montgomery College

Professional Certificate in Data Engineering

Purdue University

Oct 2025

Certifications

Microsoft Certified Professional – Database

Databricks Certified

Querying with Transact-SQL EDX

Skills

SQL Server, Snowflake, Databricks, Azure, SSRS, SSIS, Tableau, Power BI, T-SQL, Python, C++, C#, Java, Bash, PowerShell, Terraform, Hadoop, SAS, XBRL, XML, Salesforce, Talend.
